EXPERIENCE

HCLTechnologies, Pune — *Software Engineer*

Nov 2020 - PRESENT

- completed training in front-end technologies, including HTML, CSS, JavaScript, and Angular 9+. Designed and developed various mini-projects as part of assessments
- Proficient in integrating REST APIs, implementing error handling strategies, and developing reusable services, components, modules, and pipes.
- integrated vendor applications into project environments and enhanced project capabilities by leveraging third-party solutions to meet specific business requirements effectively
- Worked three months to utilizing the ReactJS library to develop and implement comprehensive event tracking solutions for applications
- Worked actively on the Agile software process model, focusing on attending Daily Scrum Meetings (DSM), participating in PI (Program Increment) planning calls, and ensuring meticulous JIRA hygiene. Played a pivotal role in fostering collaboration, maintaining project momentum, and facilitating effective sprint execution.
- utilized Git version control system, consistently raising and managing merge requests from feature branch creation to final integration
- Learn and worked on Outsystems Low-code development platform

EDUCATION

Shree Guru Gobind Singhji Institute of engineering and Technology, Nanded — *BTECH*

AUG 2017 - OCT 2020

Completed computer science and engineering coursework focusing on software development, implemet algorithms and system architecture.

Govt. Residential Women's Polytechnic , Yavatmal — *Diploma*

JULY 2014 - AUG 2017

Successfully completed a computer engineering diploma program, gaining expertise in hardware, software, and system fundamentals.

SKILLS
